## Learning While Being the Best!

Graduated with extensive knowledge in a variety of technological skills, specializing in **Web Development**. Supplemented by an expertise in **inventory management** and **leadership & communication**. My knowledge and life experiences will take your business to the next level!

**Planning, training and customer-friendliness skills.** Good communication and negotiation skills at all levels. Talent for motivating teams and maintaining the quality of work through the easy time and the difficult times.

**My objective is a position as a web developer.** Taking my knowledge of the various web languages and applying it to a practical environment, learning the nuances that come with experiencing a brand new world.

---

## Areas of Expertise

---

### PROGRAMMING AND WEB DEVELOPMENT

- 3 years of schooling at the Computer Systems Technology course at Saskatchewan Polytechnic in Saskatoon. 2 years of additional experience in web development working with popular web frameworks including NodeJS and ReactJS in both freelance and personal hobby projects.
- Experienced a variety of full stack methodologies including creating my own RESTful API and using GraphQL in an AWS cloud environment to communicate with a functional frontend.
- Has used Agile in a development environment with 5 other people to coordinate in completing a web project.
- Worked with several testing libraries including Jest, React-Testing-Library, and JUnit to create automated and practical tests.

### COMMUNICATION

- Able to work in a team environment with both experience communicating among fellow employees and listening and giving input in a meeting environment with supervisors and managers.
- Skilled in getting work done in both a large group and is very self-sufficient and can easily work alone.
- Very thorough at explaining things to peers and is very clear in communicating in English.

### LEADERSHIP

- Taken several courses on proper leadership, including clear communication and making a brand for yourself.
- Operated a team of anywhere from 10 in a slow environment to 20 employees in a high-stress environment under my lead.
- Delegated tasks at the beginning of the day and coordinated with the senior to ensure things run smoothly.

### PROBLEM SOLVING

- Solved issues in a work environment in both client-facing issues and employee-related issues. This includes missing customer packages, issues with corporate policy, tech issues with displays and demos, and employee conflict.
- Solved issues in a development environment using skills that includes excellent deductive logic and knowledge of debugging, as well as using unit tests to analyze unintended issues with a project.
